License Statistics Dashboard

The License Statistics Dashboard gives you an overview of your license usage that helps you to monitor and manage your license servers and features at a high level by giving you an overview of the reports you care about most. The Dashboard lets you monitor various metrics at once, so you can quickly monitor and manage your license servers and features. The default Dashboard consists of the following areas:

- License Servers
- Realtime usage grid and graph (for all license servers)
- Features Expiring In 12 Months

See Customizing the Dashboard for information on rearranging and adding sections to the Dashboard.

You can restore the default Dashboard settings at any time by going to your **Account Settings** (found under the logged in username shown in the upper right of the License Statistics application window) and clicking the **Reset Dashboard** button. Selecting this option also clears all applied filters and restores column visibility in all reports.
