Debugging issues

"0x000006BA: RPC server unavailable" message

When debugging an application in which LM-X is integrated, you may see messages similar to the following:

```
0x000006BA: The RPC server is unavailable
0xC000001D: Illegal Instruction
0xC0000096: Privileged instruction
```

These messages are part of the virtual machine detection that LM-X performs, and do not indicate any errors.
