LM-X License Server Client

LM-X License Manager uses LM-X License Server Client, an independent window application that helps you to monitor and manage your LM-X License Server.

Using LM-X License Server Client, you can:

- View information and statistics about the LM-X License Server.
- Restart or shut down the license server.
- View the LM-X server's HostIDs (unique machine values that can be used to lock a license file to a host), such as Ethernet, Hostname, IP Address, etc.
- View license usage statistics for the current license server, as well as for borrow, grace and trial licenses.
- View and edit the configuration file. (A password is required to access the configuration file.)
- View and search for entries in the log file.
- Select the license server for which you wish to manage statistics by entering the license server URL. (For more information, see Using LM-X License Server Client.)
