License Statistics v6.2.2 Release Notes

License Statistics version 6.2.2 includes the fixes detailed below. Most of these improvements were made in response to customer feedback. For more information on how we incorporate customer feedback into our development process, see Customer-driven development.

For information about activating your License Statistics license, see Activating a License Statistics license on Windows or Activating a License Statistics license online.

> ⚠ In addition to learning about the changes in this release, we highly recommend reviewing the License Statistics v6.0 Release Notes, License Statistics v5.15 Release Notes and License Statistics v5.14 Release Notes if you are upgrading from an older version.

Fixes

License Statistics v6.2.2 includes the following fixes.

Issue #	Description
LICSTAT-16650	Fixed an issue with unexpected message resulting in breaking the output syntax for Altair license server.
LICSTAT-16647	Fixed an issue with errors not being displayed on user edit form.
LICSTAT-16646	Fixed an issue with UTF-8 characters not displaying properly for Highest License Usage chart.
LICSTAT-16645	Fixed an issue with misleading error message for failed Dassault license server query.
LICSTAT-16643	Fixed an issue with inserting more users into the database than the license allowed, which resulted in activating read-only mode.
LICSTAT-16639	Fixed an issue with Vendor Daemon Name field being reset when editing the license server configuration.
LICSTAT-16503	Fixed an issue with the application startup failure due to incorrect mail server configuration.
