

Current Utilization report

The information on this page refers to License Statistics v6.0 and newer, which introduced a new user interface (UI). If you are using a version previous to v6.0, see [documentation for previous versions](#).

To see a report on percentage of utilization, select the **Current Utilization** page under the **Reports** section in the left navigation pane.

The Current Utilization report shows information about the feature utilization on monitored license servers or license server groups for a particular moment. By reviewing this report, you can quickly get a picture of which features may be overused or are nearing overuse and plan your purchasing accordingly.

Note: Because the Current Utilization grid shows realtime information, you may not see the same data after some time. Use the **Utilization History** tab for a comparison of historical data.

License usage information

The license usage information includes the following:

Column Name	Description
Utilization	<p>The percentage of license use for the feature.</p> <p>The percentage of use is calculated as Used Licenses divided by Total Licenses, times 100%. For example, if you have 5 Used Licenses and 10 Total Licenses, the Utilization is $5 / 10 * 100\% = 50\%$.</p> <p>The color of the bars in the Utilization column helps you quickly recognize the level of utilization:</p> <ol style="list-style-type: none"> Red: 90% - 100% utilization Orange: 70% to 89% utilization Green: 0% to 69% utilization
Used	The number of used licenses for the feature .
Total	The total number of licenses for the feature .

You can add this report to the License Statistics Dashboard. Learn more about [customizing the Dashboard](#).
