# Features Realtime Reservations

The **Reservations** page under the **Features: Realtime** section in the left navigation pane gives you an overview for all reservations for the selected feature or all features. See License Reservations for more information about which license servers support reservations.

General Information

The General Information area at the top of the page includes identifying information for the feature and lets you select all features or individual license servers and features for which to view reservations.

Realtime Feature Reservations grid

The Realtime Reservations grid shows the reservation information for the selected license server and feature.

The Feature Reservations grid includes the following columns:

Column	Definition
Type	The type of reservation. License Statistics supports the following reservation types: • Unknown • Dynamic • User • User Group • Host • Host Group • IP • Project • Display • Autodesk ID The types of reservations listed depends on the license manager.
Pattern	The pattern (taken from the license server) used for the reserved licenses.
Total	The maximum number of licenses that are reserved.
Remaining	The number of remaining available reservations of each type.
Start Time	The time the reservation became available for checkout (not the time when the license was checked out).
Expiration Time	The time the reservation will expire.

Last Active	The last time at which the reservation was queried from the license server.
	ⓘ The color of the text used for "Last Update Time" indicates the minutes elapsed since the reservation was active:

Minutes elapsed	Color indicator
0 - 10	**Green**
10 - 20	**Orange**
20 or more	**Red**

You can add the Feature Reservations grid to the License Statistics Dashboard. Learn more about customizing the Dashboard.

Reservation details

If the reservation is active, you can click the view icon under the Action column to see a list of the user sessions that match the reservation.

ⓘ Note that this is only an approximate list of sessions that match the reservation pattern. Based on available data it's not always possible to determine if the specific session uses a specific reservation. This list may contain more sessions matching the pattern than really used from the reserved pool.

On the grid below you can see the list of all sessions matching the pattern. License Statistics matches the reservation pattern to the sessions using the following types:

- User
- User Group
- Host
- Host Group
- IP
- Autodesk ID

Reservation Details: User (user1)   ✖

	User	Host	Used	Checkout Time	Time Used	Borrow Expiration
1	John	host1	2	2020-01-08 08:00	3 m 13 d 23 h 41 min
