

Reports reorganization

License Statistics v6.14 reorganized statistical reports into a new menu structure to improve ease of use and reduce redundancy. All data reporting that was available in previous versions of License Statistics are still available with the new organization. As part of this restructuring:

- Reports have been reorganized into realtime and historical statistics for Features and Users
- The License Servers and Reports menus have been removed, and the reports under these menu items have been incorporated into other reports
- Newly named "Sessions" reports contain session data from removed reports
- A [legacy navigation menu](#) has been provided for a limited time to aid in transition from the old structure to the new structure

The new navigation is compared to the previous navigation below.

Reports navigation structure

The following table shows the old and new reports navigation structure.

Navigation prior to v6.14	Navigation for v6.14 and above
License Servers <div><div>Current Usage</div><div>Uptime</div><div>Usage History</div></div>	Features <div><div>Realtime<div><div>Sessions</div><div>Usage</div><div>Reservations</div><div>Expiring</div></div></div><div>History<div><div>Sessions</div><div>Usage</div><div>Usage Per User</div><div>Usage Comparison</div><div>Utilization</div><div>Denials</div><div>Reservations</div></div></div></div>
Features <div><div>Current Usage</div><div>Usage History</div><div>User History</div><div>Utilization History</div><div>Denials</div><div>Reservations</div></div>	
Users <div><div>Current Usage</div><div>Usage History</div><div>Denials</div><div>Reservations</div></div>	Users <div><div>Realtime<div><div>Sessions</div><div>Usage</div><div>Reservations</div></div></div><div>History<div><div>Usage</div><div>Denials</div></div></div></div>
Reports <div><div>Current Users</div><div>Usage Per User</div><div>Usage History Comparison</div><div>Current Utilization</div><div>Expiring Features</div><div>Currently Borrowed Licenses</div><div>Current Usage By Time Range</div><div>Current Usage On Multiple Hosts</div></div>	

Reports Coverage

The following table details where data from old reports can be found in the new report structure.

New reports for v6.14 and above	Contain data from reports prior to v6.14
Features - Realtime - Sessions	Features - Current Usage Reports - Current Users Currently Borrowed Licenses Current Usage By Time Range Current Usage On Multiple Hosts
