

# Users Realtime Usage

*The information on this page refers to License Statistics v6.15 and newer, which added new columns to the Current Usage grid. If you are using a version previous to v6.15, see [documentation for previous versions](#).*

The **Usage** page under the **Users: Realtime** section in the left navigation pane shows a graph and grid that help you understand how your users are using licenses.

## General Information

The General Information area lets you select the user/user group for which to view current usage.

General Information

User

system

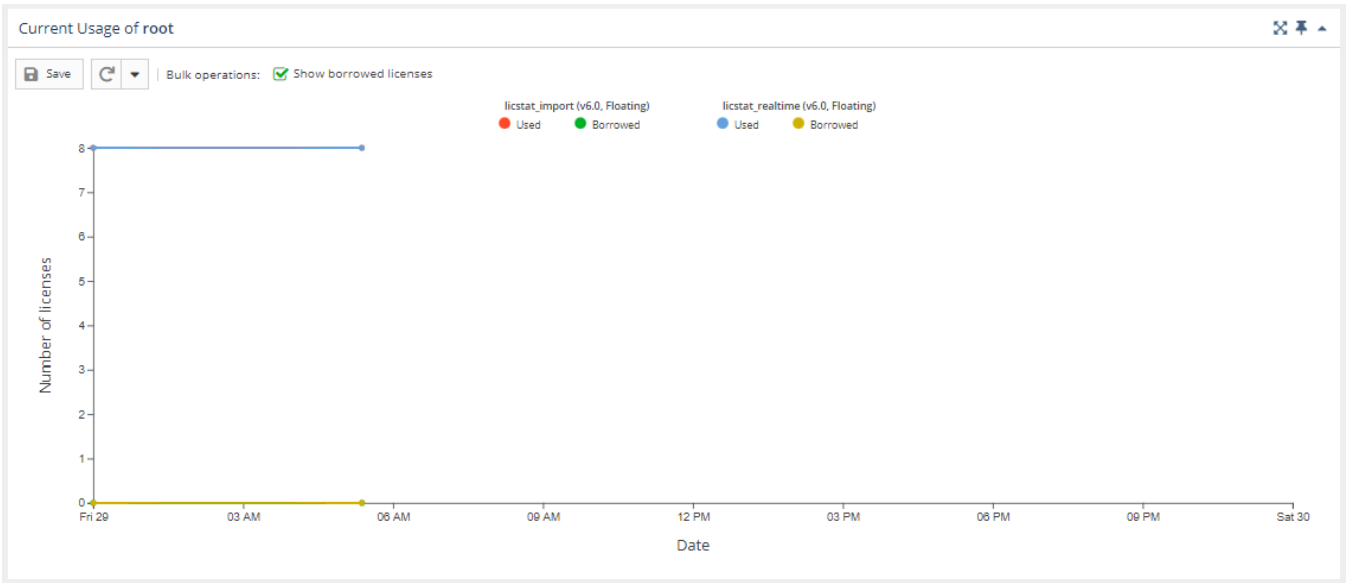

Anonymized

No

## Current Usage graph

The Current Usage graph gives you a visual picture of the number of licenses used by the selected user/user group for the specified time period.

You can hide or show used and borrowed licenses. The display of these usage details in the graphs is controlled by clicking the status for which you want to view data in the legend at the top of the chart. For example, clicking the "Borrowed" option on the graph legend will remove the lines showing the number of borrowed licenses.

## Current Usage grid

The Current Usage grid includes information about the selected user/user group's license usage, including the license server and vendor; feature information; user identification; the host that licenses were checked out from; the number of licenses used (which may be more than 1 in cases such as token licenses) and borrowed; the total number of licenses; and the percentage of utilization. If applicable, the expiration time for a borrowed license is also included in the grid.

When viewing usage for a user group, you may choose to aggregate results by Feature or by Feature and User.

Current Usage for users1 (Group) User Group, Aggregated by Feature

Aggregate by Feature

	License Server	Vendor	Feature			User	Host	Used	Borrowed	Total	Utilization
			Name	Version	Type						
1	lmx_0001	X-FORMATION	licstat	6.0	Floating	system root	ls-win-deploy ls-lin-stage ls-lin-deploy ls-sales-stage ls-ui-deploy <a href="#">Show more...</a>	11	0	50	<div><div></div></div> 22.00%
