

HostID Types

The information on this page refers to LM-X v5.3.1 and newer, which added support for Raspberry Pi HostIDs. If you are using an older version of LM-X, refer to [documentation for earlier versions](#).

The following HostID types can be used with <CLIENT_HOSTID> and <SERVER_HOSTID> tags:

HostID Type	Description
ETHERNET	Ethernet card locking
CUSTOM	Custom locking
IPADDRESS	IP address locking
HOSTNAME	Hostname locking
USERNAME	Username locking
DONGLE_HASPHL	HaspHL dongle locking
HARDDISK	Harddisk locking
LONG	Unix system specific locking
BIOS	Bios locking
WIN_PRODUCT_ID	Windows Product ID locking
AWS_INSTANCE_ID	Amazon EC2 Instance ID locking
GCE_INSTANCE_ID	Google Compute Engine ID locking
AZURE_INSTANCE_ID	Microsoft Azure ID locking
LMX_HOSTID_RPI_SN	Raspberry Pi serial number

(See [Determining which HostID to use](#) for more information about choosing a HostID that will work best for your needs.)
