## Install the LM-X SDK on Windows

The LM-X License Manager installation wizard guides you through the installation procedure, so you can be up and running on a Windows machine in 5 minutes or less.

To install LM-X on a Windows machine:

## Step 1. Start the installation wizard.

Step 2. Accept the X-Formation End User License Agreement.

闄	LM-X SDK v4.	5.8 win64_x64 \$	Setup	<b>– – X</b>
End-User License Please read the fo	e Agreement Ilowing license agreem	ent carefully		X-Formation

Step 3. Choose whether to use an existing LM-X security configuration file.

Note the following:

- If you are installing LM-X for the first time: Choose the first option.
  If you are upgrading LM-X to a newer version or compiling LM-X on multiple platforms: Choose an existing LM-X security configuration file.

₿	LM-X SDK v4.5.8	win64_x64	Setup	<u> </u>
Security Co Choose whe LM-X SDK in:	onfiguration File other to use an existing security stallation.	configuration file	e from a previous	X-Formation
● Do not use	e existing security configuration	file		
		Back	Next	Cancel

If you have chosen the second option above, use an existing security\_config.Imx file from a previous LM-X installation, as shown below.

## Step 7. Activate the license.

Note the following:

- If you are installing LM-X for the first time: Enter your Activation Key (sent to you via email).
  If you are upgrading LM-X: Select the option to browse for and select a previously activated license file.
