

Resetting the admin username and password

The information on this page refers to License Statistics v6.18 or newer, which introduced the CLI. If you are using an earlier version, please refer to the [documentation for earlier versions](#).

If at any time you need to reset the [License Statistics login](#) username/password to the default "admin/admin" settings, use one of the following options:

1. [Run a CLI command](#) (Windows or Linux).
2. [Use License Statistics Manager](#) (Windows only).
