

LMX_OPT_HOSTID_COMPARE_FUNCTION

eOption	LMX_OPT_HOSTID_COMPARE_FUNCTION This flag causes a callback function to be called to override the existing compare to verify whether a server HostID or client HostID is valid.
pSetting	Function pointer value. Default value: NULL (disabled) Prototype: <pre>LMX_STATUS (LMX_CALLBACK *HostidCompareCallBack_pfn) (LMX_KEY_HOSTID_TYPE eKeyHostidType, /* LMX_CLIENT_HOSTID or LMX_SERVER_HOSTID expected */ const LMX_HOSTID pLicenseHostid[], int nLicenseHostids, const LMX_HOSTID pSystemHostid[], int nSystemHostids);</pre> See Custom HostID compare for information on using this callback function.
