

LMX_OPT_LICENSE_PATH

e O pt ion	<p>LMX_OPT_LICENSE_PATH</p> <p>This flag sets the predefined license path, which is the default path the client application searches through to find a license. See How a protected application finds its license in the <i>LM-X End Users Guide</i> for complete information about the license format, as well as the format of the environment variables users can set to specify a license file path.</p>
p S et ti ng	<p>NULL-terminated string.</p> <p>Default value:</p> <p>NULL (disabled)</p>
