

LMX_OPT_CUSTOM_HOSTID_FUNCTION

e O pt ion	LMX_OPT_CUSTOM_HOSTID_FUNCTION This flag causes a callback function to be called if using the HostID functions LMX_Hostid() and LMX_HostidSimple() with parameter LMX_HOSTID_CUSTOM. This callback function is also called during checkouts when the license includes one or more custom HostIDs, regardless of whether a local license or a license server is being used.
p S et ti ng	Function pointer value. Default value: NULL (disabled) Prototype: <pre>LMX_STATUS (LMX_CALLBACK *CustomHostidCallBack_pfn) (LMX_HOSTID *pHostid, int *npHostids);</pre> See LMX_Hostid for information on using this callback function.
