

FindCustomerByCustomTag

The FindCustomerByCustomTag function is used to find one or more existing customers using a custom tag.

The custom tag you must specify consists of the tag name and value. You must give the entire custom tag name exactly as it exists in LAC. The custom tag value can be a partial entry (for example, to find all customers that include a tag value "NewCustomer" you could enter only "New") and is case-insensitive (for example, "NEW" and "new" are interpreted as the same entries).

This function also uses an [offset](#) and requires a login token, which is obtained using the [Login](#) function.

Return values

The response is of the type [Soap_Response_List_Customer](#), with result_array of type [ArrayOfSoap_Customer](#).

Example request

```
<soapenv:Envelope xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns:xsd="http://www.w3.org/2001/XMLSchema" xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/" xmlns:ns="https://license.x-formation.com/soap/type/vendor/version/1">
  <soapenv:Header/>
  <soapenv:Body>
    <ns:FindCustomerByCustomTag soapenv:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
      <token xsi:type="xsd:string">c2acbae7b6b11aa1d7ea4454b5b5cffe6ca015be</token>
      <name xsi:type="xsd:string">Tag1</name>
      <value xsi:type="xsd:string">1</value>
      <offset xsi:type="xsd:int">0</offset>
    </ns:FindCustomerByCustomTag>
  </soapenv:Body>
</soapenv:Envelope>
```

Example response

```
