

Usage Per Feature report

This page refers to functionality that has been removed from License Statistics.

To see a report on usage per feature, select the **Usage Per Feature** tab from the Reports page.

The Usage Per Feature report shows license usage information for each feature or a selected feature for the current license server on a daily basis. These statistics include the minimum and maximum number of licenses used and borrowed, the total number of licenses, the number of hours the licenses were used, and the number of denials for the feature.
