

Currently Borrowed Licenses report

 This page refers to functionality that has been removed from License Statistics. Reports have been restructured and reorganized as of License Statistics v6.14. The contents of the Currently Borrowed Licenses report have been moved to [Features - Realtime - Sessions](#).

To see a report on borrowed licenses, select the **Currently Borrowed Licenses** page under the **Reports** section in the left navigation pane.

By default, the report shows borrowed licenses for all license servers. You can see borrowed licenses for a specific license server by selecting it from the **Select License Server** pick list at the top of the page.

The Currently Borrowed Licenses report shows the number of licenses used, checkout and borrow expiration times, and the user and host (and Host IP, hidden by default) for each borrowed license for each feature on the selected server (or all servers, if All is selected).

Currently Borrowed Licenses									
	License Server	Feature			Used	Checkout Time	Borrow Expiration ↑	User	Host
		Name	Version	Type					
1	Catia Server	catia_license	3.0	Floating	2	2019-08-22 09:00	2019-08-23 09:00	John	Host1
2	Catia Server	catia_license	3.0	Floating	2	2019-08-22 13:00	2019-09-10 13:00	Sam	Host1
3	Catia Server	catia_license	3.0	Floating	3	2019-08-22 14:00	2019-10-23 14:00	John	Host2
