

# End-user REST API

The following sections describe the End-user REST API calls.

| Version                   | Description                                                           |
|---------------------------|-----------------------------------------------------------------------|
| <a href="#">Version 1</a> | Original version of the End-user REST API                             |
| <a href="#">Version 2</a> | Introduced return codes in all responses in addition to text messages |
| <a href="#">Version 3</a> | Introduced CORS headers in all responses                              |
