## **Using LM-X License Server Client**

## Selecting a license server

The first time you access LM-X License Server Client, a small dialog with a combo box pops up that lets you either select a LM-X license server's IP address as the URL from the list or type it directly. You can choose from the following URLs:

- http://lmx-demo.x-formation.com (the demo server which you can use to test the application)
- and
  your local host of the LM-X license server, which defaults to 6200 (for example http://lmx-server-host:6200).

🔒 LM-X License Serv	er Client	-	×
License Server URL:	http://lmx-demo.x-formation.com		~
	http://lmx-demo.x-formation.com		
	http://pb-win-13:6200		

After you make your selection, you can easily view and manage the license server of your choosing, as shown below.

## Selecting a license server that is down

When you select a server which is down, then the main window turns grey and the message "License server is down" is displayed, as shown below.

After removing the URL, you will be automatically switched to the server above the one you have removed.

Note: You cannot delete all servers - when only one server is left, "X" disappears.
