LM-X License Manager v4.7.6 Release Notes

LM-X License Manager version 4.7.6 includes the fixes detailed below. The changes in this release were made primarily in response to customer feedback. For more information about how we incorporate customer feedback into our development process, see Customer-driven development.

Fixes

LM-X v4.7.6 includes the following fixes.

Issue #	Description
LMX-2706	Improved init loading script to eliminate a problem with reading license files from a directory different than LM-X installation dir when running LM-X license server as a service.
LMX-2705	Fixed an issue with inconsistent behavior of token-based licenses with the same token names which resulted in an inability to check out the last feature.
