LM-X License Manager v4.8.8 Release Notes

LM-X License Manager version 4.8.8 includes the fixes detailed below. The changes in this release were made primarily in response to customer feedback. For more information about how we incorporate customer feedback into our development process, see Customer-driven development.

Breaking Changes

With this release, we're introducing enhancements to secure store, allowing for more safety, improved speed, and greater capacity. Please note that secure store might not migrate successfully from an older version of LM-X to a newer version, which can result in data loss.

Fixes

LM-X v4.8.8 includes the following fixes.

Issue #	Description
LMX-3043	Fixed an issue with secure store which caused the disappearing of borrows after the restart of the license server.
LMX-3035	Fixed an issue with lack of permissions when borrowing licenses on Windows.
LMX-2953	Eliminated a problem with LM-X installer not being able to read symlinks.
