

# Current Utilization API

 This page refers to functionality that has been removed from License Statistics. This information no longer applies to License Statistics v6.3 and newer.

The Current Utilization endpoint delivers license usage metrics specific to the [Current Utilization report](#).

## Obtaining information about current feature utilization

You can easily fetch metrics about current feature usage for a given feature by sending the following HTTP request.

```
GET /api/v1/report/current-utilization/${returnType}
```

where \$ indicates a variable value that you can replace with a value that best suits your needs. The possible parameters are described below.

Parameter	Required	Type	Description
\${returnType}	Yes	string	Standard format option. See <a href="#">Making an API request</a> for details.
standard report options	No	various	See <a href="#">Making an API request</a> for details.

### Response

On success, this report will contain one row for each **feature** or **feature composite** (cumulative feature in license server group), that currently is used on any license server. Each row consists of the following columns.

Column	Full name	Type	Description	Visible by default in export
fid	Feature ID	integer	Internal License Statistics identification of the feature or feature composite.	✔ Yes
fns	Feature Name	string	Name of the feature or feature composite.	✔ Yes
ft	Total	integer/string	Total amount of licenses for feature or sum of totals of all features in composite. May be "Unknown" or "Unlimited."	✔ Yes
ftype	Feature Type	enumeration	Type of the feature or feature composite. See <a href="#">feature type descriptions</a> for further details.	✔ Yes
fu	Used	integer	Amount of used licenses for feature or cumulative amount of used licenses for feature composite.	✔ Yes
futil	Utilization	decimal	Percentage of used licenses (used/total).	✔ Yes
fv	Feature Version	string	Version of the feature or feature composite.	✔ Yes
ig	Is Group	boolean	True if row represents feature composite, false for single feature. For information about groups, see <a href="#">License server groups</a> .	✔ Yes
lsid	License Server ID	integer	Internal License Statistics identification of: <ul style="list-style-type: none"><li>for feature, license server hosting the feature.</li><li>for feature composite, license server group of the composite.</li></ul>	✔ Yes
lsn	License Server	string	Name of license server or license server group.	✔ Yes
vn	Vendor	string	Vendor of license server or license server group.	✔ Yes

### Example

The following example shows a command that downloads the current utilization report in CSV format.

```
curl -H "X-Auth-token: token" "http://yourdomain/api/v1/report/current-utilization/csv"
```
