

License Server Group API

This page refers to functionality that has been removed from License Statistics. This information no longer applies to License Statistics v6.3 and newer.

Obtaining a license server group list

You can easily list license server groups created in License Statistics by sending the following HTTP request.

```
GET /api/v1/license-server-group/${returnType}
```

where \$ indicates a variable value that you can replace with a value that best suits your needs. The possible parameters are described below.

Parameter	Required	Type	Description
\${returnType}	Yes	string	Standard format option. See Making an API request for details.
standard report options	No	various	See Making an API request for details.

Response

On success, this report will contain one row for each **license server group**. Each row consists of the following columns.

Column	Full name	Type	Visible by default in export
lsgid	License Server Group ID	integer	 No
lsgn	Group Name	string	 Yes
lsgd	Description	string	 Yes

Note that the order in the table is the default order of the columns in the exported file.

Examples

The following examples make use of the GET method.

Example 1

Say you would like to get the list of all license server groups. To generate this data set, enter a command similar to the following.

```
curl -H "X-Auth-token: token" "http://yourdomain/api/v1/license-server-group/json"
```

Example 2

If you'd like to obtain license server group information filtered by name in CSV format, enter the following command.

```
curl --data "filter=[{\"type\"=\"string\", \"field\"=\"lsgn\", \"value\"=\"abc\"}]"  
-H "X-Auth-token: token" "http://yourdomain/api/v1/license-server-group/csv"
```

Example 3

In order to get information about license server group with an ID of 1, enter the following command.

```
curl --data-urlencode "filter=[{\"type\"=\"numeric\", \"field\"=\"lsgid\", \"comparison\"=\"eq\", \"value\"=\"1\"}]" -H "X-Auth-token: token" "http://yourdomain/api/v1/license-server-group/json"
```
