

Viewing license server details

 *This page refers to functionality that has been removed from License Statistics. Reports have been restructured and reorganized as of License Statistics v6.14.*

Prior to v6.14	v6.14 and newer
<i>Current Usage</i>	Features - Realtime - Usage
<i>Uptime</i>	Administration - License Servers tab
<i>Usage History</i>	Features - History - Usage

The [Current Usage](#), [Uptime](#), and [Usage History](#) pages under the **License Servers** section let you quickly access any license server details you are interested in. You can also go directly to the Current Usage page for a license server by clicking on the server name from the License Servers section of the [Dashboard](#).

General Information

All license server pages include a General Information area at the top of the page that shows general information about the selected license server, including:

- License server name
- Vendor name
- Statuses for each [data source type](#) (Remote Monitoring, Importing, and End User Monitoring)
- Last update time

 The color of the text used for "Last Update Time" indicates the minutes elapsed since the last update time:

Minutes elapsed since last update time	Color indicator
0 - 10	Green
10 - 20	Orange
20 or more	Red

Editing license server information

To [edit license server information](#), use the License Servers page under the Administration section.
