

Viewing database size

The information on this page refers to License Statistics v6.0 and newer, which introduced a new user interface (UI). If you are using a version previous to v6.0, see [documentation for previous versions](#)..

To see how much data is stored in each table in the License Statistics database, select the **Data Management** page under the Administration section. (This page is visible only for License Statistics administrator users.)

The Database Size grid gives information for each database table, including the data, index and total size of the data stored in the table, as well as the number of rows in the table.
