License Statistics v5.10 Release Notes

License Statistics version 5.10 includes the enhancements and fixes detailed below. Most of these improvements were made in response to customer feedback. For more information on how we incorporate customer feedback into our development process, see Customer-driven development. For information about activating your License Statistics license, see Activating a License Statistics license on Windows or Activating a License Statistics license online.

Enhancements

License Statistics v5.10 includes the following enhancements.

Issue #	Description
LICSTAT-12837	Replaced XLS export format with XLSX.
LICSTAT-12805	Replaced string filters with list filters for relevant grid columns.
LICSTAT-12678	Removed deprecated endpoints from API related to: Usage History API Feature API
LICSTAT-12647	Added configurable decimal precision for statistics such as usage hours and percentages in applicable reports.
LICSTAT-12558	Introduced new grid in Administration page for Imported License Servers, which allows you to edit and remove imported license servers. In relation to supporting this new grid: • The Realtime License Servers tab in the Administration page was renamed to License Servers. • All License Server edit actions from the Dashboard and License Servers pages were moved to the License Servers tab in the Administration page.
LICSTAT-12497	Made improvements to date range forms, including ability to specify time intervals.
LICSTAT-12492	Introduced new layout of XLSX output files to correct issues with column formatting.
LICSTAT-12035	Introduced ability to add the Usage History Comparison grid to the Dashboard.
LICSTAT-11453	Improved filenames for reports exported to different formats.

Fixes

License Statistics v5.10 includes the following fixes.
