

Viewing license server details

 This page refers to functionality that has been removed from License Statistics. Reports have been restructured and reorganized as of License Statistics v6.14.

| Prior to v6.14 | v6.14 and newer |
|----------------|--|
| Current Usage | Features - Realtime - Usage |
| Uptime | Administration - License Servers tab |
| Usage History | Features - History - Usage |

The [Current Usage](#), [Uptime](#), and [Usage History](#) pages under the **License Servers** section let you quickly access any license server details you are interested in. You can also go directly to the Current Usage page for a license server by clicking on the server name from the License Servers section of the [Dashboard](#).

General Information

All license server pages include a General Information area at the top of the page that shows general information about the selected license server, including:

- License server name
- Vendor name
- Statuses for each [data source type](#) (Remote Monitoring, Importing, and End User Monitoring)
- Last update time

 The color of the text used for "Last Update Time" indicates the minutes elapsed since the last update time:

| Minutes elapsed since last update time | Color indicator |
|--|-----------------|
| 0 - 10 | Green |
| 10 - 20 | Orange |
| 20 or more | Red |

Editing license server information

To [edit license server information](#), use the License Servers page under the Administration section.
