Operating system and resource requirements

ⓘ License Statistics is supported on Windows 10 Pro on the Long-Term Servicing Branch (LTSB) of Windows 10 and will remain supported for the lifetime of the app.

Resource-specific considerations for running License Statistics are given in the table below. We do our best to ensure License Statistics runs on all remaining distributions, but we cannot offer any guarantees. Requirements also vary depending on the number of license servers you are monitoring.

Requirements for	Small Installations (up to 10 license servers)	Large Installations (more than 10 license servers)
Operating System	Windows 64-bit (requires .NET v4.8): • Windows 10 • Windows Server 2012 R2 and higher	Windows 64-bit (requires .NET v4.8): • Windows 10 • Windows Server 2012 R2 and higher
	Linux 64-bit: • Ubuntu 18.04 LTS and higher (LTS versions recommended) • Red Hat Enterprise 7 and higher • Debian 9 and higher	Linux 64-bit: • Ubuntu 18.04 and higher (LTS versions recommended) • Red Hat Enterprise 7 and higher • Debian 9 and higher
Resources	2 core CPU 6 GB of available RAM memory Harddisk or SSD for MySQL	4 core CPU or more 12 GB or more of available RAM memory SSD for MySQL
