Java licensing policy

The information on this page refers to License Statistics v6.14 and newer, which introduced a new Java licensing policy. If you are using a version previous to v6.14, see documentation for previous versions.

As of License Statistics v6.14, X-Formation will no longer deliver the Oracle OpenJDK and its corresponding license policy.

X-Formation has transitioned to using Eclipse Temurin by Adoptium, a project supervised Eclipse Foundation. This Java solution is free to use and includes active support for years into the future.

The License Statistics installation is now delivered with JRE v17, released on September 14, 2021, which is an LTS version with active support for the next 5 years. License Statistics will be delivered with Adoptium JRE v17 with later updates. However, you can use a custom Java v17 implementation of your choice by changing the JAVA_PATH configuration option in xflicstat.cfg or by making the appropriate setting in License Statistics Manager.
