

FindLicenseOrderByProductTemplate

The information on this page refers to SOAP version 4. This function did not exist in previous SOAP versions.

The FindLicenseOrderByProductTemplate function is used to find one or more license orders by product template ID.

This function will allow multiple product template IDs to be specified, but does not allow partial entry of the product template ID.

This function uses an [offset](#) and requires a login token, which is obtained using the [Login](#) function.

Return values

The response is of the type [Soap_Response_List_LicenseOrder](#), with result_array of type [ArrayOfSoap_LicenseOrder](#).
