

License Statistics v5.15.5 Release Notes

License Statistics version 5.15.5 includes the fixes detailed below. Most of these improvements were made in response to [customer feedback](#). For more information on how we incorporate customer feedback into our development process, see [Customer-driven development](#). For information about activating your License Statistics license, see [Activating a License Statistics license on Windows](#) or [Activating a License Statistics license online](#).

 In addition to learning about the changes in this release, we highly recommend reviewing the [License Statistics v5.15 Release Notes](#) and [License Statistics v5.14 Release Notes](#) if you are upgrading from an older version.

Enhancements

License Statistics v5.15.5 includes the following enhancements.

Issue #	Description
LICSTAT-15692	Add information to Linux installer that using port number lower than 1025 requires root privileges.
LICSTAT-15690	Anonymised configuration file (xflicstat.cfg) is now attached to single archive for support purposes .

Fixes

License Statistics v5.15.5 includes the following fixes.

Issue #	Description
LICSTAT-15747	Fixed an issue with invalid links on supported license servers documentation page.
LICSTAT-15746	Fixed an issue with window size and incorrectly displayed labels for User and Host Groups.
LICSTAT-15745	Fixed an issue with incorrectly displayed port form field for IBM LUM redundant servers (HAL) configuration.
