Supported license servers

The information on this page refers to License Statistics v6.19 or newer, which added import support for Dassault license servers. If you are using a version previous to v6.19, see documentation for previous versions.

The following table contains information about the license servers from which License Statistics can gather usage statistics and lists features that are supported by specific license servers.

License Manager	Data Sources Allowed			Import support (when applicable)	Feature Versioning	Realtime Denials	License Borrowing	License Reservations	Token Licenses
	Remote	Import	End User						
LM-X License Manager	✓	✓		Extended log files for denied requests and pay-per-use log files	✓	✓ ****	✓	✓	
Altair License Manager (ALM)	✓				✓	✓	✓		
Altium Infrastructure Server (AIS/PLS)	✓	✓		Log files					
ANSYS		✓		Log files	✓				
Autodesk	✓		✓						
Beta-LM	✓								
CodeCollaborator		✓		Log files					
CodeMeter	✓								
Custom Application management			✓		✓				
Custom License Server	✓				✓	✓	✓	✓	
Dassault Systemes License Server (DSLS)	✓	✓				✓	✓	✓	✓
EPLAN License Manager (ELM)	✓				✓	✓	✓		
Felics		✓		Advanced log files					
FLEXlm/FlexNet*	✓	✓		Denied request logs and encrypted report log files	✓		✓	✓	✓
GNS	✓								
Green Hills Software (GHS)	✓	✓		Log files					
IBM LUM	✓	✓		Denied request logs	✓		✓		
JetBrains	✓								
LICMAN	✓								
License4J	✓				✓				
LS-DYNA	✓								
Mathematica License Manager (MathLM)	✓								
OLicense	✓								
Oxygen	✓								
Reprise License Manager (RLM)	✓	✓		Denied request and report log files	✓				
RSoft		✓		Log files					
Sentinel Hardware Keys (SHK)		✓		Log files					
Sentinel HASP		✓		Log files					
Sentinel RMS **	✓	✓		Report log files	✓		✓		
SmartPlant License Manager (SPLM)		✓		Log files					
TASKING License Manager (TLM)	✓				✓		✓		
Zoo License Manager	✓	✓		Log files	✓		✓ ***		

* FLEXlm/FlexNet token licenses are supported only for vendor MSC (http://www.mscsoftware.com) for features CAMPUS, MDAdv, NASTRAN, NA_ACMS, and MSCONE; and for vendor ugslmd (Siemens) for the feature simcenter_token.

** For Sentinel RMS, denials are imported along with the usage data when importing the report log file.

*** For Zoo License Manager, license borrowing is supported only for imported data.

**** For LM-X License Manager, denials monitoring is supported for v4.4 and above.

See System requirements for more information about requirements for gathering data from these license servers.

Importing log data

Importing must be enabled when adding or editing a license server. (For information about generating denied request logs, see Denied Requests Log requirements.) Imported license server data viewable in License Statistics is limited based on the data in the imported log; therefore, some License Statistics reports may not contain any information when viewing imported data.

Notes

- In addition to the supported license servers listed above, you can also use License Statistics with any other license server by using a custom XML file, as described in Supporting a custom license server. You may also request custom support for vendors or their features not listed above by contacting X-Formation Support or submitting a request.
- License Statistics can also be used to gather statistics for standalone applications.
- If you have problems with a particular license server, you may be able to obtain a pre-release version of the parser included in core.jar.
