

# Downloading License Statistics data

The information on this page refers to License Statistics v6.11 and newer, which improved downloaded chart naming. If you are using a version previous to v6.11, see [documentation for previous versions](#).

You can download License Statistics reports and charts you access in the License Statistics web application as described below.

## Downloading reports

License Statistics reports can be downloaded in the following formats:

- Comma-separated value (CSV) list
- Excel compatible file (Note that this applies to Microsoft Excel 2007 or higher)
- PDF file

To download report data as one of these formats, select the desired format from the options under the **Save As** button at the bottom right of any License Statistics usage data list. License Statistics handles exporting the report data, so downloading reports does not require an internet connection.

Report: Current Utilization Administrator ▾

Current Utilization ⌵

	Feature			Vendor	License Server	Used	Total	Utilization ↓
	Name	Version	Type					
1	<a href="#">feature4_sim</a>	1.0	Floating	X-FORMATION	<a href="#">xf</a>	85	100	85.00%
2	<a href="#">feature2_sim</a>	1.0	Floating	X-FORMATION	<a href="#">xf</a>	18	25	72.00%
3	<a href="#">licstat_import</a>	6.0	Floating	X-FORMATION	<a href="#">xf</a>	22	50	44.00%
4	<a href="#">licstat_realtime</a>	6.0	Floating	X-FORMATION	<a href="#">xf</a>	22	50	44.00%
5	<a href="#">feature5_sim</a>	1.0	Floating	X-FORMATION	<a href="#">xf</a>	0	2	0.00%
6	<a href="#">feature3_sim</a>	1.0	Floating	X-FORMATION	<a href="#">xf</a>	0	1	0.00%

PDF

**Note:** Some grids also enable you to export reports to FLEXIm/FlexNet option files, as described in more detail in [Importing and exporting FlexNet option files](#).

## Downloading charts

You can download License Statistics charts to PNG format by clicking the **Save** button in the upper left of the chart area. Downloading a chart image does not require an internet connection.

The title of the downloaded chart will match the chart title, including the applied time range; for example:
