

FindLicenseByExpirationDate

The information on this page refers to SOAP version 1. This function has been replaced in SOAP version 2 with the function [FindLicenseByExpirationDateBetween](#).

The FindLicenseByExpirationDate function is used to find all licenses that have an expiration date that is earlier than the date specified in this function.

This function requires a login token, which is obtained using the [Login](#) function. This function also uses an [offset](#) and an expiration date in the format YYYY-MM-DD. For example, if you have three licenses that expire on 2015-05-26, 2015-09-10, and 2015-12-02, and you specify an expiration date of 2015-09-10 in this function, the first two licenses will be returned.

Return values

The response is of the type [Soap_Response_List_License](#), with result_array of type [ArrayOfSoap_License](#).
