

Agent groups

The information on this page refers to License Statistics v6.9 and newer, which introduced Agent groups.

Agent groups are available only with [Licensing Model 2019](#).

Administrative users can [create and manage Agent groups](#) using the **Agent Groups** tab in the **Groups** page, found under the Administration section in the left navigation pane.

The screenshot shows the 'Administration: Groups' page in the License Statistics application. The left navigation pane is open, showing the 'Groups' section under 'Administration'. The main content area displays the 'Agent Groups' tab, which contains a table with two columns: 'Name' and 'Auto Assign'. The table lists two agent groups: 'Agents for License Harvesting' and 'My Agent Group'. Both groups have 'Auto Assign' set to 'Yes'. The 'Description' column provides details for each group. The 'Action' column includes edit and delete icons. Below the table, there is a pagination bar showing 'Page 1 of 1' and a 'Save As' button.

	1↑ Name	Auto Assign	Description	Action
1	Agents for License Harvesting	Yes	Group of harvesting-enabled Agents	
2	My Agent Group	Yes	Optional description for this Agent group.	

Agent groups are similar to other group types, with the following additions:

- When creating or editing an Agent group, you can set an option to automatically assign all new Agents to the group (see [Creating and managing groups](#)).
- For Agents added before License Statistics v6.9: during migration to 6.9, a group will be created automatically for each Autodesk license server monitored using Agents.

Adding and removing Agent groups

In addition to adding and removing Agent groups using the Groups page, you can add and remove groups directly from the [Agents page](#).
