# Send email to customer

To send email to a customer, use the following request:

```
POST /customers/id/email
```

where:

- *id* (integer) is the customer ID.

#### Request JSON Objects

Valid JSON parameters include the following.

| Parameter | Type | Required | Definition |
|---|---|---|---|
| subject | string | No | Email subject |
| body | string | No | Email body |

#### Example request

```
PATCH /customers/1/email HTTP/1.1
Content-Type: application/json
Authorization: Bearer f794846b7c26621688e1e06164975b4eae8ce2f6

{
        "subject": "email subject",
        "body": "message content",
}
```

#### Response

The LAC REST API returns the standard HTTP response codes described in the following table.

| Status Code | Description |
|---|---|
| 200 OK | Email sent. |
| 403 Forbidden | Invalid or expired token provided. |
| 404 Not Found | Customer id does not exist. |

#### Example Response

```
HTTP/1.1 200 OK
Content-Type: application/json

{
        "message": "Success!"
}
```
