Get all custom tag names

To retrieve all custom tag names that match the specified criteria, use the following request:

```
GET /custom-tag-names
```

Example request

```
GET /custom-tag-names HTTP/1.1
Authorization: Bearer f794846b7c26621688e1e06164975b4eae8ce2f6
```

Response

The LAC REST API returns the standard HTTP response codes described in the following table.

Status Code	Description
200 OK	Custom tag names list.
403 Forbidden	Invalid or expired token provided.

Example Response

```
HTTP/1.1 200 OK
Content-Type: application/json
[
        {
                "name": "Customer",
                "CustomTags": [
                        {
                                "tag_name": "custom_tag_1",
                                "value": null,
                                "creation_time": null,
                                "update_time": null
                        },
                        {
                                "tag_name": "custom_tag_2",
                                "value": null,
                                "creation_time": null,
                                "update_time": null
                        }
                ]
        }
]
