

Updating from version 6.6 and above on Windows

As of License Statistics v6.6, the Windows installer automatically updates License Statistics and preserves all data and configuration settings.

1. [Back up the database using the License Statistics Manager](#), or if needed, see the instructions for:
 - [Backing up an embedded database](#)
 - [Backing up an external database](#)
2. Download the License Statistics installation from the [License Statistics download page](#).
3. Start the installer and follow its instructions.

Make sure that 3rd party utilities (like query tools) are always stored *outside* of the License Statistics installation directory to avoid their removal by the installer.
