License Statistics v6.12 Release Notes

License Statistics version 6.12 includes the new features, enhancements and fixes detailed below. Most of these improvements were made in response to customer feedback. For more information on how we incorporate customer feedback into our development process, see Customer-driven development.

For information about activating your License Statistics license, see Activating a License Statistics license on Windows or Activating a License Statistics license online.

In addition to learning about the changes in this release, we highly recommend reviewing the License Statistics v6.0 Release Notes, License Statistics v5.15 Release Notes and License Statistics v5.14 Release Notes if you are upgrading from an older version.

This release contains breaking changes. Before upgrading to License Statistics v6.12, make sure that your environment matches the requirements listed below:

1. As of Java JDK v16, the deprecated protocols TLS 1.0 and 1.1 are no longer supported.
2. The minimum supported version of MySQL server is v5.7.28.
3. License Statistics API v1 was deprecated as of License Statistics v6.8 and is being removed in the current release.

New features

License Statistics v6.12 includes the following new features.

Note that some new features are available only when using the new licensing model (2019).

Issue #	Description	New licensing model (2019) only
LICSTAT-11917	Added support for remote monitoring of CodeMeter Network License Server.	⭐
LICSTAT-9624	Added the ability to maximize content such as grids and charts to take up the full size of the application window.	
LICSTAT-6292	Added the ability to control user session length under Administration.	

Enhancements

License Statistics v6.12 includes the following enhancements.

Issue #	Description
User interface	
LICSTAT-18719	Added ability to select all license servers and features on License Servers - Current Usage report.
LICSTAT-16884	Made improvements to responsive design.
API	
LICSTAT-18720	Created API v3 with extended reports that allow selection of all license servers and features. This applies to the following reports: • Features - Usage History • Features - Current Usage • Features - User History • License Servers - Current Usage API v3 is still under development, and therefore is considered unstable. We reserve the right to provide breaking changes for this unstable API version in upcoming releases.
Application architecture	

LICSTAT-19131	Forced minimum external MySQL server version to v5.7.28.
LICSTAT-19123	Upgraded embedded MySQL server to v5.7.33.
LICSTAT-19061	Upgraded Java JDK to v16. Removed support for TLS v1.0 and v1.1 protocols.
Removed features	
LICSTAT-17839	Removed API v1 support. API v1 was marked as deprecated as of License Statistics v6.8. As of this release, API v1 is no longer available. Use stable API v2 instead.

Fixes

License Statistics v6.12 includes the following fixes.

Issue #	Description
