Authorization

To authorize API calls, add an *Authorization* header to the request:

Authorization: Bearer *token*

The following sections describe the API calls for authorization tokens, including:

[Create token](#)

[Delete token](#)

Base URL

The URLs given for each endpoint are abbreviated. The base URL that must be used for all endpoints is:

`https://license.x-formation.com/rest/v1/`

For example, the full URL for [POST /auth/tokens](#) is:

POST `https://license.x-formation.com/rest/v1/auth/tokens`
