

# Saving parser output to a file

You can export and save parser output to a file; for example, X-Formation Support may request this file for troubleshooting.

To save parser output to a file:

1. Go to the **License Servers** page, found under the Administration section in the left navigation pane. (This page is visible only for License Statistics administrator users.)
2. Click the **Edit** icon in the Action column of the License Servers grid row for the license server you want to print parser output for. An Edit License Server dialog opens.
3. Open the Remote Monitoring tab, and click **Verify** at the bottom of the page.

Edit License Server

General

Remote Monitoring

Importing

Enable Remote Monitoring

General

Query Tool Path

Encoding

Query Interval

Gathering Data

Connection

Query Tool Path

Encoding

Query Interval

Gathering Data

Connection

Verify

Save

Save and Close

Close

Verification may take a long time depending on the license manager's response time, and the status will show that the server is being verified.

The output should look similar to the following.

License Server Remote Monitoring Configuration Verification

Status

Output

Success

# Output 1
